Objective

I am completing my Bachelor of Computing Systems degree at Unitec Institute of Technology. My peers will describe me as a passionate and determined individual. I believe practical experiences is a complement to any educational studies. As I am progressing through my Information Technology pathway, I am seeking to gain industry experience in preparation for a software and web development career.

Skills

Programming:	Front-End:	Back-End:	Frameworks:	Additional skills:
• Java	• HTML5	• Node	• React	• Microsoft SQL Server
• Python	• CSS3	• Express	• Redux	• SDLC
• C	• JavaScript (ES6)	• MongoDB	• React Native	• Wireframing / UML
			• Bootstrap 4	• Git / GitHub
			• Sass	• Linux / Debian / Raspbian

Work Experience

The Warehouse (October 2019-January 2020)
- Assist in the Online Department team with online customer orders
- Hitting daily target shipping orders
- Packing orders to be shipped out
- Stacking products, replenishing stock and labelling

Projects

Timetable Planner (November 2019-Present)
- Re-innovating Unitec's re-enrollment system web application
- Solve the in-efficiency and complicated existing re-enrollment system
- Develop a brand new Front-End with **React JS** / **Redux** / **Sass**
- Create a personalized Chat Bot Assistant using **IBM Watson Assistance**
- *Source code:* https://github.com/vBoBv/Timetable-Planner
- *Chat bot Preview Link:* https://assistant-chat-au-syd.watsonplatform.net/web/public/121a7fcc-f8f1-456e-9b80-6d1b2b2b14df

Portfolio (September 2019)
- Static website developed with **React JS / Redux**
- Responsive website compatible with Desktop/Tablet/Mobile version
- *Source code:* https://github.com/vBoBv/ponhvathvann
- *Website:* https://vbobv.github.io/ponhvathvann/

Banking Application (August 2019)
- A GUI application developed with **Java** programming language
- Desktop version of an Online Banking
- User can deposit, withdraw and transfer money from different accounts
- Implemented Java Date API, File and Exception Handlings
- *Source code:* https://github.com/vBoBv/Banking-Application

Movie Rental Membership System (April 2019-June 2019)
- A GUI software developed with **Java** programming language
- Utilized Object-Oriented Programming
- Encapsulation, File Handlings and Exception Handlings
- Implemented ArrayList and String Tokenizer to read and write data to csv files.

- *Source code:* https://github.com/vBoBv/Customer-Membership-Software

Escape Game (September 2018-November 2018)
- A text-based console game developed with **Python** programming language
- Taking input from the user and using functions to move player from one position to another
- A battle-scene between the boss and the player
- Using loops to print the fight scene and to process the battle-scene
- *Source code:* https://github.com/vBoBv/Escape-Game

Education
Unitec Institute of Technology
- Bachelor of Computing Systems (July 2018-Present)
- New Zealand Certificate in Information Technology (February 2018-June 2018)

Beltei International School
- Highschool Diploma (2017)

Achievements
Unitec Institute of Technology
- EduHack Cultural: Best Use of Technology (2019)
- EduHack Cultural: Best Business Idea (2019)
- International Academic Excellence Scholarship (2019)
- Top student in Certificate in Information Technology (2018)

Beltei International School
- First runner up for the top student in high school. (2017)

Volunteer
Unitec Institute of Technology
- A representative for the Computing Department consulting with Auckland Highschool career advisors.
